Re. - Order for consulting/advise in lab design/implementation
- Your email offer 2022-A292 EggTuber, Productie lab Enschede, Netherlands (rev 0)

Barchem, 09-02-2022

Dear Mr. van Oost and Mr. van Berkel,

Again, many thanks for your offer. We understand and appreciate your thorough working method with milestones to warrant success. Following our discussion yesterday, I hereby confirm our order as follows.

EGE's lab project is already quite far underway and Labs31 currently doesn't know what has already been prepared by EGG/EGE. Even though we appreciate that Labs31 will only invoice EGE for worked hours, so in reality it can be quite less, we find your offer too much time/money to now commit to. In addition we also have concern that with your detailed, step-by-step approach there will be quite some unnecessary work, which can cause unnecessary delays.

We therefore agreed yesterday that EGE would give Labs31 the order for consulting/advising services as 'two-stage rocket':

- EGE herewith buys 8 man days consulting services from Labs31 (i.e. total EUR 10k) for Labs31 data collection, 'looking over EGE shoulder' and advising in the phase we are currently in. This is an important phase because we now need to make decisions about purchasing equipment, etc.
- In this period Labs31 then can also demonstrate the added value and necessity of the BIM/milestone approach that you propose.

We are also interested to take your Purchase Consultancy services as offered in #5 and other specialized advice, such as wastes disposal methods, clean room inspection services, etc. We propose to discuss this further when we get there.

We herewith give the purchase order for 8 man days consulting hours. Please note that Labs31 can only work on topics that we EGE asks by email and that we need specification of worked hours.

If you accept this order, please sign below. Terms and conditions in Labs31 offer are valid.

With best regards,

Signed in approval
